

Civil Construction Technician

Job Description:

Civil Technicians must be able to pay attention, be a team player and learn how to perform the tasks necessary to construct cell phone towers. This work requires candidates who are dependable, punctual and have the ability to work quickly with accuracy.

Civil Technicians will be using basic hand and power tools, including shovels, posthole diggers, etc. They will also be working around and with earthmoving equipment, such as skid-steers and mini excavators. Civil Technicians will be responsible with tying rebar, building and placing concrete forms, as well as finishing concrete. They will help with excavating trenches, placing power, Telco conduit and underground utilities. Also, civil technicians will use exothermic welds to build and place grounding systems. Civil Technicians will work with the civil crew to remove brush and trees to prepare tower sites for construction, and will place stone as needed for access routes and tower site compounds.

Requirements:

- Experience using hand and power tools, and in basic tasks such as digging is preferred
- Be willing to work long hours and weekends when necessary
- Be willing to travel to job sites as needed
- Get along well with others, and take direction well
- Attend company provided training, and acquire certifications in RF, Trenching, First Aid, CPR
- Have a valid drivers license, a clean driving record, and pass a DOT physical
- Consent to background checks, and drug testing
- Basic construction knowledge
